

...easier
to play!

MARTIN
Baritone
SAXOPHONE

In recognition of the baritone saxophone's ever growing importance, this completely new Martin has been designed to give you a far better tone quality and a smoother, easier action.

It's as easy to play as a tenor... because of its redesigned key placement and mechanism. Action is light and fast, *perfectly balanced*. Cello-like tone is richer, more resonant, especially in the low register. You'll like the way this new baritone responds, too. Here again, it handles like a fine tenor.

Try it, and you'll know why Martin is credited with having developed a baritone saxophone that's far ahead of them all!

SPECIAL FEATURES OF THIS WONDERFUL, NEW BARITONE

GREATER NECK ADJUSTMENT: Special Martin design gives this new baritone saxophone an unusually wide angle of neck adjustment... lets you set the mouthpipe at the right place for comfortable, easy playing.

SIMPLIFIED OCTAVE MECHANISM: Ingenuity of Martin craftsmen has given this new baritone saxophone a simplified octave mechanism that is the last word in easy operation, and is practically trouble-free for life.

INDIVIDUALLY FITTED KEYS: All keys of the Martin baritones are individually fitted by hand... assuring accurate, positive action and accelerated technique.

UNIFORM METAL THICKNESS, TEMPER: Martin's time-tested socket construction technique produces a saxophone that has uniform metal thickness and even temper throughout... eliminates dull tones, gives brilliance and accuracy to the entire range of the instrument.
